EDUCATION

KCC Institute of Technology and Management,

2023 - 2027

B.Tech. in Computer Science & Engineering

Kendriya Vidyalaya AGCR Colony

Grade 12 || Grade 10

SKILLS

Web Development: HTML | CSS | React.js | Node.js | Express.js | REST APIs

Database & Backend: MongoDB | Mongoose | Authentication (Clerk)

DevOps & Tools: Git | GitHub | Linux (Ubuntu) | Ollama | Electron

Data Structures & Algorithms: C++ | Python | LeetCode | 500+ Problems Solved

- Arrays | Linked Lists | Stacks & Queues | Trees | Recursion | Sliding Window | Two Pointers | Greedy Algorithms | Prefix Sum | Graphs | Dynamic Programming

PROJECTS

Offline AI Enterprise Assistant : (Python, Flask, Ollama, Electron | AI & Privacy-Focused Application)

- Built a 100% offline privacy-first AI assistant, ensuring zero cloud data transfer for sensitive information.
- Integrated local AI models for code generation, document summarization, and question answering.
- Designed a desktop application with Electron and optimized model switching for better performance on low-memory systems.

Lost & Found Items AI : (React.js, Node.js, Express.js, MongoDB | Full-Stack Web Application)

- Built a web platform that helps users report lost items and find matching belongings more easily.
- Implemented secure user authentication and AI-assisted item matching to improve the search process.
- Developed the frontend, backend APIs, and database integration for a complete full-stack solution.

Skill Matcher: (React.js, Node.js, Express.js | Skill Matching Web Application)

- Built a skill matching system to compare and analyze employee skill sets
- Implemented compatibility evaluation logic for project assignments and team management
- Managed project version control and documentation using GitHub

HACKATHONS & CODING EVENTS

GeekVerse Hackathon – GGSIPU (East Delhi Campus):

05/2025 – 05/2025

Conducted by Geek Room USAR & IEEE WIE USAR April

East Delhi

- Participated in a team-based hackathon focused on real-world problem solving.
- Collaborated with team members to explore frontend development concepts.

HackIndia 2026 – Web3 & AI Hackathon:

03/2026 – 03/2026

Hosted by Voyager Coding Club with HackIndia & C# Corner | 36-Hour Hackathon

Greater Noida

- Built an offline AI enterprise assistant focused on privacy and secure local AI execution.
- Explored AI integration, offline processing, and secure system architecture

Code Farming – 24 Hour Code-A-Thon:

04/2026 – 04/2026

Organized by Voyager Coding Club & HackerRank

Greater Noida

- Participated in a 24-hour competitive coding event focused on problem solving and aptitude.
- Strengthened logical thinking, coding consistency, and performance under pressure.
